

## **ADAIR COUNTY HEALTH DEPARTMENT HOSTS CURBSIDE COVID-19 VACCINE CLINIC MAY 5**

**Kirksville, MO 4/026/21** – The Adair County Health Department has scheduled another curbside vaccine clinic for Wednesday, May 5, 2021, from 2-4 p.m. at the Health Department facility at 1001 S. Jamison, Kirksville. The clinic is open to all individuals age 18 and older who live or work in Missouri and who have not yet completed their COVID-19 vaccine series.

The Moderna vaccine requires two doses. If you receive your first dose on May 5, the second dose will be administered June 2, 2021 at the same scheduled time. If you will be unable to appear at the same location for your second dose on June 2, do not sign up for the May 5 event. If May 5 will be your second dose, you must have received your first dose on or before April 7, 2021.

Participants must be wearing masks and should wear short-sleeved shirts for easy access to the upper arm. After receiving the dose, you will be required to remain in the parking lot for 15 minutes to be monitored for reactions to the vaccine.

Anyone who has received any vaccine other than for COVID-19 within the past four weeks prior to the May 5 event should not sign up.

Residents interested in receiving the vaccine should sign up using the [Sign-Up Genius link](#) on the Adair County Health Department [website homepage](#) or [Facebook page](#). Those who do not have internet access may register by calling 660-730-6100 or 660-730-6200.

Registrants will need to present a completed [COVID-19 Vaccination Consent](#) form before receiving the vaccine. The form can be accessed via the Health Department website. Forms will also be available at the curbside event; however, if you do not arrive with a completed form, the process will take longer.

Although there is no charge for the vaccine, Medicare beneficiaries are asked to bring their Medicare or Medicare Advantage cards to the event.
